Linkedin: rokas-barsauskas

A fourth year student of "Information Systems" study programme, interested in Front-end technologies and development.

💼 EXPERIENCE

UAB „VISMA LIETUVA"

15 Jul, 2016 – 15 Sep, 2016

.NET INTERNSHIP

Main activities and responsibilities: creating Single-Page Application, which consumes REST API, creating application's User Interface, modifying and reviewing teammates' back-end, front-end code, attending Scrum meetings.

- Developing SPA (Single-Page Application) with AngularJS.
- Consuming REST API, which was written in .NET Web API.
- Creating User Interface with Sass (CSS Pre-Processor) and HTML.
- Applying Scrum work process: weekly DEMOs, daily Stand-ups.

UAB „VIRTUSTREAM LT"

1 Jun, 2017 – Current

SOFTWARE ENGINEER INTERN

Main activities and responsibilities: contributing to xStream product's User Interface.

- Working with modern Web Front-end technologies.
- Improving existing Client-side browser application by using JavaScript libraries, Sass (CSS Pre-Processor) and HTML.
- Learning and applying verified coding patterns.
- Collaborating with team members.

🎓 EDUCATION

KAUNAS UNIVERSITY OF TECHNOLOGY

01 Sep, 2014 – Current

BACHELOR OF INTERNET INFORMATION SYSTEMS AND DATABASE PROGRAMMING

Mostly I have been learning and applying these concepts and technologies:

- Objected Oriented Programming (Java) – mostly for learning data structures, algorithms, analysing efficiency of algorithms, creating small desktop projects.

- MVC frameworks (Java Spring, PHP Laravel, PHP Symfony) – been using for creating small Web applications.

- ORM frameworks (Spring Hibernate, PHP Doctrine 2) – been using in Web applications to connect to databases.

- Oracle, MySQL databases basics, SQL – for learning and working with relational databases.

- Git – version control system for small group Web projects.

- Requirements Engineering (BPMN diagrams, UML diagrams) – been using for analysing our team's project requirements.

ADDITIONAL INFORMATION

COURSES

PRACTICING JAVASCRIPT TECHNOLOGIES (REACT, NODE.JS)

After creating Web projects in various frameworks I found myself having the best time in developing and working with Front-end technologies, Web APIs and JavaScript language.

From the very beginning of 2017, I have been spending my free time on learning : **JavaScript**, **React** with **Redux**, **Node.js**.

Most of the basic knowledge I have gain is from various articles and these online courses:

- [JavaScript : Understanding the Weird Parts](#),

- [Learn and Understand NodeJS](#),

- [Modern React with Redux](#), [Advanced React and Redux](#).

SKILLS

Beginner:	React	Redux	Webpack	Node.js
	JavaScript (ES6)		Backbone.js	

Intermediate:	CSS3	HTML5	REST API

Other experience:	Java	C#	Git	SQL	MVC	ORM

LANGUAGES

Lithuanian	Mother-tongue
English	Advanced user
